

David K. Egyir

EGYIR is **passionate** about helping serious people like you to escape the most dangerous — *common but avoidable* — problem most people (rich, poor, educated, uneducated, religious, and non-religious alike) face in life. Also, he designs and builds beautiful, cost-effective and functional buildings, and graphics. And he helps executives, marketers, and business owners to make effective presentations; what you may call *winning presentations*.

He is an **Architect**, a **Designer**, and a **Life Coach**. And an **Entrepreneur**.

Especially as a life-coach, he has been popularly adjudged the best coach for excelling in education, increasing wealth, eliminating stress, and enjoying true fulfilment in life! Egyir understands life thoroughly and shares amazingly liberating insights from a uniquely empowering perspective. He has a firm conviction that, **“The greatest tragedy in life is that majority of people have accepted to be less than they were born to be and are thus accomplishing far less than their true capabilities.”** To that end, he authored (wrote) **Purpose Compass**, the exceptional life-coaching book that reveals 4 habits that are currently making your life difficult, or otherwise may soon make your life difficult, but which your parent, teacher, or pastor would dare not talk about; how to escape them and get to live a stress-free life of purpose faster! And 13 other equally amazing books that constitute the Zing4Life! Series.

Egyir is also **lead promoter** of the electronic, trendy and amazing **Smart Business Card**, the only business card you’ll ever need, for the executive in you!

Positionally, he is the Lead Founder and CEO of **Seers**, Associate Architect of **Arthro Synergeio**, Lay Preacher of **The Methodist Church Ghana**, Global Lead Advocate of **Zing4Life!** and Volunteer Mentor with **iMentor Ghana**.

He is a husband, and a father of two.
